Salone Fresh Harvest

Linking farmers to the market through one web and mobile portal

Pitch deck

The Problem

Farmers

Farmers struggle to reach buyers beyond their local market, and fresh produce can spoil before it is sold.

Customers

Households and businesses find it hard to source fresh farm produce of known quality, price and origin.

The gap

There is no simple way to order, pay and receive farm produce directly from the farmer in one place.

Our Solution

A web and mobile portal that connects farmers directly to customers. Customers order and pay online, and farmers deliver.

1

Farmers list

Farmers post fresh produce, quantities and prices.

2

Customers order and pay

Customers browse, order and pay on web or mobile.

3

Farmers deliver

Farmers provide delivery of the order to the customer.

4

Fresh at the door

Customers receive farm produce straight from the source.

Target Market

Farmers

Smallholder farmers and farmer groups who sell on the portal

Households

Families who want fresh produce delivered

Food businesses

Restaurants, hotels and caterers

Retail

Supermarkets, shops and market traders

Institutions

Schools, hospitals and offices

Partners

NGOs, government, donors and investors

Business Model

Service fee per order

[__]% of each order value paid on the portal

Delivery arrangement

Farmers provide delivery; the delivery charge is set per order

Partnerships

Development partners, NGOs and bulk buyers

Fee levels to be confirmed.
